...interest rates, which could destabilise economies unless diversification is enacted. But where can central banks turn to reduce their dollar dependence? Gold is one answer and has regained popularity in 2024. As an alternative, a BRICS currency would be designed as a reserve currency for trade within the bloc. **However, there are notable challenges** Firstly, BRICS members have diverse economies and interests and balancing these interests within a unified currency system could be difficult, as each country has its own currency stability, economic goals, and monetary policies. Moreover, a BRICS currency would require robust financial infrastructure and cooperation. The member countries would need..
